

Shaun Barrowes TECHNICAL REQUIREMENTS -

Audio:

- Wireless Handheld SHURE BETA SM58 on adjustable Boom Stand
- Keyboard or Piano, 88-weighted keys (For keyboards, Yamaha or Roland preferred)
- 2 professional sound wedges - one at the piano, one front of stage
- Front of House must be high-end (no Eons on sticks)

TIPS:

- Engineer please add in effects, delay, reverb when singing (not when speaking)

Video:

- IMAG (for audiences over 150 attendees): Image magnification is recommended but optional. Ideal placement should be to either side of the stage without obstruction
- Projection should have switch to PowerPoint/Keynote
- Per contract, Recording will be given to Speaker following presentation either on SD card for quick upload, or via hard drive
- Video (no audio) and Slides all coming from Speaker's laptop on stage with him

TIPS:

- Image should focus from Speaker's hips to head throughout presentation.

Lighting:

- Professional Stage Lighting required (not ceiling lights) - especially for IMAG enhancement
- Light must focus on speaker AND stay off of any projection. Basic bright amber wash sufficient.

Staging:

- Stage size 12'X12' minimum
- Risers appropriate to audience need, recommend minimum of 12'X16' at 1.5' height
- High-Boy skirted on stage at Speaker's side, where laptop and props will remain throughout presentation. Please no other client use of this table.
- Recommended Audience Seating: Theater style, classroom seating, or round tables. Speaker cannot present in the round or in casual cocktail, standing room only setting. This is a sit and watch presentation.
